

# ABOUT US

Pollinator Partnership (P2) is a nonprofit registered charitable organization and an international leader in pollinator science, management, and conservation. Our team of scientists specialize in habitat creation and enhancement, research, and education. We provide the highest level of scientific advising and consultation services to public and private groups; helping people and organizations incorporate pollinator conservation into their operations.

Contact us to find out how we can help you meet your pollinator conservation goals.

# OUR SERVICES

We offer sector-specific expertise in pollinator conservation and education, at competitive rates. We work with the agricultural, corporate, educational, energy generation and transmission, and transportation sectors.

- 01

**Habitat creation and enhancement:** Land assessment, seed and plant mix design and sourcing, comprehensive plans; from gardens, to farms, to industrial and conservation lands
- 02

**Pollinator education:** for your staff and clients, we offer trainings, guides, toolkits, and certifications, tailored to your needs
- 03

**Auditing of practices:** we review organizational practices and procedures and offer practical integration of pollinator-supporting practices
- 04

**Monitoring and research:** we assess pollinator value of habitat so you can show your stakeholders and clients the results of your conservation actions

## BENEFITS OF CONSULTING WITH US

Partner with the largest non-profit organization in the world dedicated exclusively to the protection of pollinators and their habitat

With over 25 years of experience in pollinator conservation, education, partnership, and habitat creation, and a staff of dedicated scientists, you can be confident in our advice and expertise

Our network of partners and experience across North America and globally means we can provide expertise wherever you are and across your operating locations
