Farms can support pollinators by including habitat and reducing harmful pesticides, and as a result, receive financial and operational benefits.

Urban, suburban, and rural landscapes can include pollinator-friendly gardens and habitats.

The work of pollinators helps ensure a full, diverse harvest and a thriving economy.

Pollination services bring an estimated one out of three bites of food.

Research is essential to maintaining healthy pollinator populations, ecosystems, food supplies, and economies.

Renewable energy, such as solar, can receive efficiency benefits and provide environmental benefits by integrating pollinator habitat.

In the future, we will have a sustainable and equitable world for people and pollinators, with food production, ecosystems, and economies thriving.

A l’avenir, nous aurons un monde durable et équitable pour les hommes et les pollinisateurs, avec une production alimentaire, des écosystèmes et des économies prospères.

En el futuro, contaremos con un mundo sostenible y equitativo para las personas y los polinizadores, donde la producción de alimentos, los ecosistemas y las economías prosperarán.
