Planting Guide for your native pollinator garden

Use the arrangement below to have a continuous garden - spring, summer, & fall

6'

3'

For best results, use multiple plants of each species.

Follow these steps to create your beautiful native pollinator garden

1 Identify your garden spot:

- ✓ Find a 3' x 6' plot that gets 6+ hours of sun.
- ✓ Have a larger area? Include more choices and clump the same species together.
- ✓ Remove or smother existing lawn or vegetation.
- ✓ Enhance hard-packed soil with organic compost.

2 Buy plants at a local native plant nursery, if possible.

3 Plant!

- ✓ Arrange plants with different seasonal blooms in your plot.
- ✓ Dig holes twice as large as each plant's pot.
- ✓ Remove the plant from the pot, loosen the roots, place it in the hole, backfill, tamp soil, and water.
- ✓ Mulch plot to depth < 1 inch, keeping mulch away from stems and avoid using hardwood chips and shreds.

4 Maintain your garden:

- ✓ Water to keep moist throughout the first two weeks, then as needed or when plants droop.
- ✓ Weed as needed.
- ✓ Avoid using insecticides, herbicides, or fungicides.
- ✓ Be patient your garden may take a few years to fully establish and fill in!
