

Planting Guide for your native pollinator garden

Use the arrangement below to have a continuous garden - spring, summer, & fall

SOUTHWEST

AZ, NM

BLOOM SEASON

-  Spring
-  Summer
-  Fall

For best results, use multiple plants of each species.

NATIONAL MUSEUM of NATURAL HISTORY
Smithsonian

POLLINATOR PARTNERSHIP

Follow these steps to create your beautiful native pollinator garden

SOUTHWEST

AZ, NM

1 Identify your garden spot:

- ✓ Find a 3' x 6' plot that gets 6+ hours of sun.
- ✓ Have a larger area? Include more choices and clump the same species together.
- ✓ Remove or smother existing lawn or vegetation.
- ✓ Enhance hard-packed soil with organic compost.

2 Buy plants at a local native plant nursery, if possible.

3 Plant!

- ✓ Arrange plants with different seasonal blooms in your plot.
- ✓ Dig holes twice as large as each plant's pot.
- ✓ Remove the plant from the pot, loosen the roots, place it in the hole, backfill, tamp soil, and water.
- ✓ Mulch plot to depth < 1 inch, keeping mulch away from stems and avoid using hardwood chips and shreds.

4 Maintain your garden:

- ✓ Water to keep moist throughout the first two weeks, then as needed or when plants droop.
- ✓ Weed as needed.
- ✓ Avoid using insecticides, herbicides, or fungicides.
- ✓ Be patient - your garden may take a few years to fully establish and fill in!
