## 1) 2022 POLLINATOR POSTER

In past years, NAPPC posters have been a great success, and we are excited to share with you the opportunity to have your organization's logo on the 2022 poster.

Posters are distributed to schools, fairs, conferences, homes, educational trainings, and Pollinator Week events. The posters have no time or date on them, so they are always relevant to the conversation. They are extremely popular for pollinator education and outreach purposes. See past posters at [www.pollinator.org/shop/posters](http://www.pollinator.org/shop/posters).

**This year's poster will be available for distribution by or before Earth Day, Friday, April 22, 2022. If your organization would like your logo on the poster and copies of the poster, please consider sponsoring at the Bronze level (\$5,000) or above by Friday, February 18<sup>th</sup>!**

### Wings of Life – Pollinating Butterflies and Moths

This year's poster will focus on the order of Lepidoptera (butterflies and moths), and the essential role they play in pollination, culture, and ecosystem services throughout North America. Butterflies and moths are found in almost every terrestrial ecosystem from deserts to tropical rainforests, and thousands of flowering plants have evolved to rely specifically on their pollination services, although not all species in Lepidoptera are considered pollinators. Certain plants like Indian paintbrush have evolved to attract butterflies through their brightly colored flowers that open during the day, while others, like Yucca, put out especially fragrant and pale-colored flowers to attract moths that pollinate at night. Most butterflies are diurnal (day-active), and so moths are vitally important for the role they play in pollination at night. They also provide pollination to certain flowering plants like honeysuckle that are not visited by bees and other pollinators during the day.

## 2) POLLINATOR WEEK JUNE 20-26, 2022

Fifteen years ago the U.S. Senate's unanimous approval and designation of the final full week in June as Pollinator Week marked a necessary step toward addressing the urgent issue of declining pollinator populations. Pollinator Week has now grown to be an international celebration of the valuable ecosystem services provided by pollinating animals. The growing concern for pollinators is a sign of progress, but it is vital that we continue to maximize our collective efforts.

Pollinating animals, including bees, birds, butterflies, bats, beetles and others, are vital to our delicate ecosystem, supporting terrestrial wildlife, providing healthy watersheds, and more. Pollinator Week is a prime opportunity to get the message of the importance of pollinators out to as many people as possible.

### Pollinator Week Highlights:

- Officially designated by the U.S. Senate and the U.S. Dept. of Agriculture in 2007
- 50 Governors have declared State Pollinator Week
- Pollinator Week brings together a diverse community of interested parties: government officials, farmers, ranchers, non-profit groups, teachers, school children, clubs, and a whole range of interested citizens taking action for pollinators
- Constantly updated Pollinator Week website with event listings, useful resources, and more!

### 3) 22ND ANNUAL NAPPC INTERNATIONAL CONFERENCE

**Hosted at the Smithsonian National Museum of Natural History**

**October 18 - 20, 2022**

#### CONFERENCE

The 22nd Annual NAPPCC International Conference is an invitation-only strategic event that brings together the world's preeminent scientists and pollinator experts to discuss current issues affecting pollinators and ways to further pollinator conservation.

#### ABOUT

The North American Pollinator Protection Campaign (NAPPC) is a private-public collaborative body that works to promote and protect pollinators. NAPPC is coordinated by Pollinator Partnership, a 501(c)3 non-profit organization.

NAPPC is a growing, collaborative body of more than 160 diverse partners. Respected scientists, researchers, conservationists, government officials and dedicated volunteers are succeeding with major programs to protect pollinators, to raise pollinator-related issues, and to benefit the health of all species – particularly those most threatened.

More information about NAPPC and the 22nd Annual NAPPC international Conference can be found at [www.napppc.org](http://www.napppc.org).
